INDUSTRIAL FABRICATORS RECEIVES SAFETY AWARDS

Industrial Fabricators, Inc. (IFAB), a seven facility metal fabrication company, was recently recognized, by the State of North Carolina, for exemplary safety performance.

IFAB's strategic plan centers on being recognized as the supplier of choice in the Southeast for non-automotive related metal fabrication by 2020.

An important focus of IFAB's strategic 2020 vision plan is overall team safety. Under the leadership of Safety Director, Amy Shirley and the contributions of several dedicated team members, IFAB has put in place a high-performance safety program based on ownership of safety assurance at a facility, department and individual team member level.

The procedural upgrades, team involvement/ownership and constant reinforcement/training has paid dividends, but the effort goes on to continuously improve safety assurance at Industrial Fabricators.
